in an affordable way*

INTERMITTENT  
COMPRESSION

COLD THERAPY

EASY TO OPERATE

PRESET 9 MENUS

BATTERY SOLUTION FOR  
TREATMENT ON THE GO

CoolGards brings you advanced and affordable technology for recovery after injury or surgery.

This recovery system combines the benefits of intermittent compression and cold therapy to enhance lymphatic function, encourage blood flow, and to help stimulate tissue repair faster and better.

## Intermittent compression

Intermittent compression mimics natural muscle contractions to get swelling away from the injury area, helping to encourage oxygenated blood flow with deeper penetrating of coldness.

## Cold therapy

Cold therapy reduces inflammation and edema (swelling), decreases muscle spasms, decreases metabolic demand, and can help relieve pain without narcotics.

## Easy to use

Simply press the power-on button to start the treatment. Temperature and treatment mode will show on the screen for a better control of treatment process.

## Flexible treatment

Preset 9 menus of pressure and time, from low to high and 20 minutes to 60 minutes. It is flexible for you on treatment to achieve the best care for you.

## On the go solution

The system can be entirely battery operated with enough charge to complete 8-12 treatments. It is small enough to be carried on a plane or bus ride.

## 4 pads for your option

It comes in a range of pad types to fit different body parts, including shoulder, knee, leg, ankle and more.

## ACCESSORIES

AC Adaptor  
(Included)

Hose (Included)

carry bag  
(Optional)

Drain gadget  
(Optional)

Power Bank  
(Optional)

## 4 PADS FOR YOUR OPTION

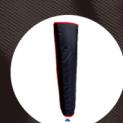

Shoulder Pad

Knee Pad

Ankle Pad

Full Leg Pad
